

**DOCKET NUMBER: YOR920010520US1**

service agent exits the apparatus through the client port as taught by Sawada in the claimed invention of Valencia in order to make remotely control home network devices available using wide-area network such as the Internet (See col. 1, lines 30-34).

In response, applicants respectfully state claim 35 is a dependent claim that depends on an allowable claim, and is therefore allowable. Furthermore, the cited reference to Sawada (col. 2, ln. 27-52) fails to teach, we contend, the use of service agents with which the browser server interacts to adjust the behavior the service controlled by the service agent.

A listing of the claims is provided as required in the new USPTO amendment practice per 37 CFR 1.121.

It is anticipated that this amendment brings the application to allowance of all the claims. Favorable action is respectfully solicited. In the unlikely event that any claim remains rejected, please contact the undersigned by phone in order to discuss the application.

Please charge any fee necessary to enter this paper to deposit account 09-0468.

Respectfully submitted,

By:
